

Aditya Birla Group Engineering Leadership Program 2026

Engineering Leadership Program at Aditya Birla Group is an early career program to build next-generation technical leaders with values, attitudes, and skills necessary to understand and address complex engineering problems. Final year engineering students pursuing full-time B.E/B. Tech degrees from select colleges in India are eligible to apply for the program across multiple streams. On joining the Engineering Leadership Program in one of the business units of the group, participants are expected to undergo training on the manufacturing processes and technology for a period of 1 year through on the job and classroom-based exposures. Upon successful completion and subsequent confirmation at the end of training period, participants are placed into a full-time technical role with a specific business of the Aditya Birla Group.

The offer will be valid subject to the receipt and confirmation of:
